

John's Astrology Reading with Krishna

John recently had a Personalised Astrology Reading from Krishna which he describes as truly insightful and mind blowing!

Please enjoy reading about John's experience!

I, like a lot of people I suspect, tended in the past to view astrology with a certain level of healthy scepticism as perhaps something useful mainly for filling a small section of the daily newspaper, right alongside the Snoopy comics and the tide guides. After all how can all Scorpios experience a bad day at the very same time? Or how can every Cancer be about to cross paths with old friends?

Then, a little while ago, I was fortunate enough to have an astrology report drawn up for me based on my exact time of birth and location. Upon receiving this written report, I was intrigued to find that many of the details and characteristics described of me where very accurate. I found this quite surprising, that a simple knowledge of when you where born and where you where born could give so much information about what makes us who we are.

When the opportunity arose again to have an astrology reading done with Krishna, in an intimate environment whereby all the details would be explained to me in person, I leapt at the chance. Once again, all that was given to Krishna in the way of personal information about me was my time, date and place of birth. The resulting astrology reading and chart interpretation was simply mind blowing!

After taking the time to explain the relevant planetary alignments and what these meant to me as person, Krishna made me realise that astrology is actually a science. The added value that Krishna brings to a personal reading however, is her vibrant energy and her extremely highly developed intuition. I discovered that it is true, as I am an Aries, I will possess certain typical Aries qualities, however as she made me aware, the influences of the other heavenly bodies make up the finer details of who we really are.

Krishna sat and discussed aspects of my life path with me in a way that no one could have known and definitely not in the minute detailed way that she described. The whole experience for me was one of fulfilling self discovery coupled with realisations of what has been and what will come for me in this journey we call life.

I would highly recommend a reading with Krishna to anyone, simply for the sheer joy of learning about ones self in more detail, but also to share in her most vibrant energy.

Over all rating two thumbs up! Thanks Krishna.

Blessed be...
John
